

Your partner

In technical & product development

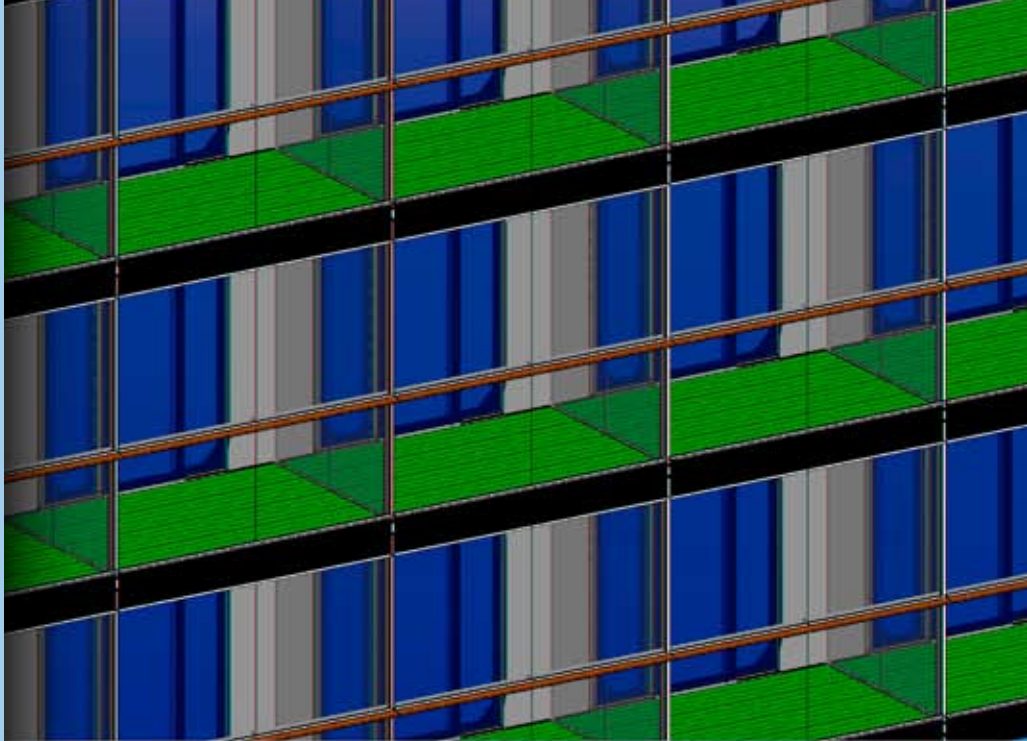

LSK FACTS

- LSK-PROJECT was established in November 2008 by Juha Hiirsalmi, Richard Sundblom, Teuvo Lavonen and LSK-Machine Oy.
- Our office and workshop are located in the southwest corner of Finland, 30 minutes from Turku Yard.
- All key persons have years of experience in working in marine field.

- Our experience include:
 - Prefabricated balconies
 - Hinged and sliding doors
 - Balustrades, glass walls and wind screens
 - Windows (wheelhouse, cabin, heated, openable)
 - Moveable glass roofs over pool area etc.
 - Person elevators, cargo and special lifts
 - Water hatches and side doors
 - Window washing units
 - LED-lightning on outer decks
 - Car ramps, passenger gangways, cargo handling systems
- Turnkey deliveries all over the world

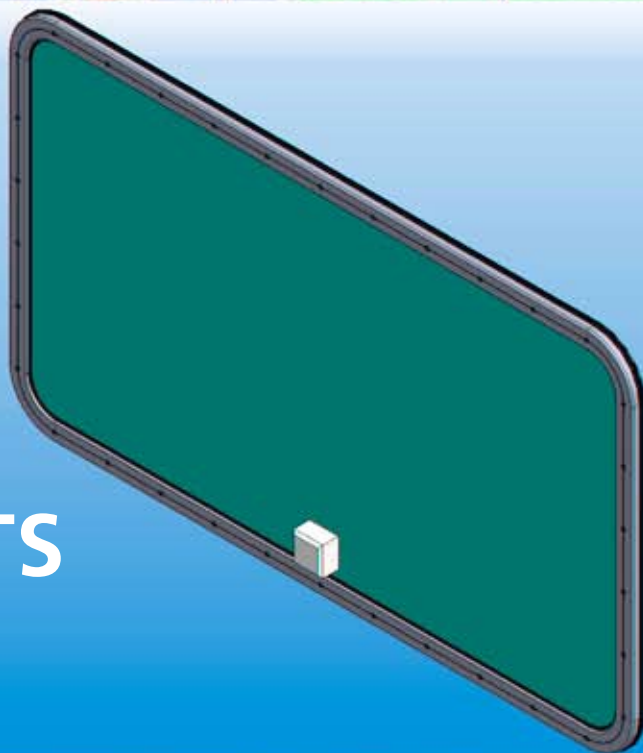

GREEN BALCONY

- Weather tight construction reduces considerably ships air resistance and need of cooling/heating of cabins
- Integrated solar panels produce all the energy used in the balcony cabins
- New balcony door concept reduces heat transmission to/from the cabin

ENERGY SAVING WINDOWS

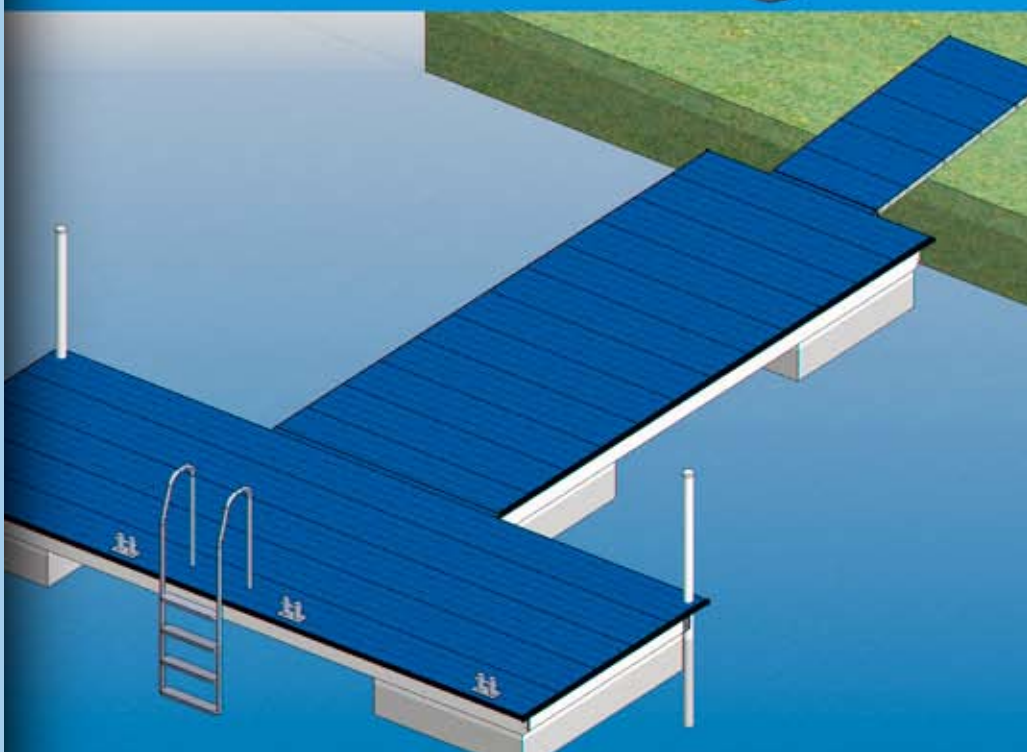

- New construction reducing energy transmission >15%

NEW PRODUCTS

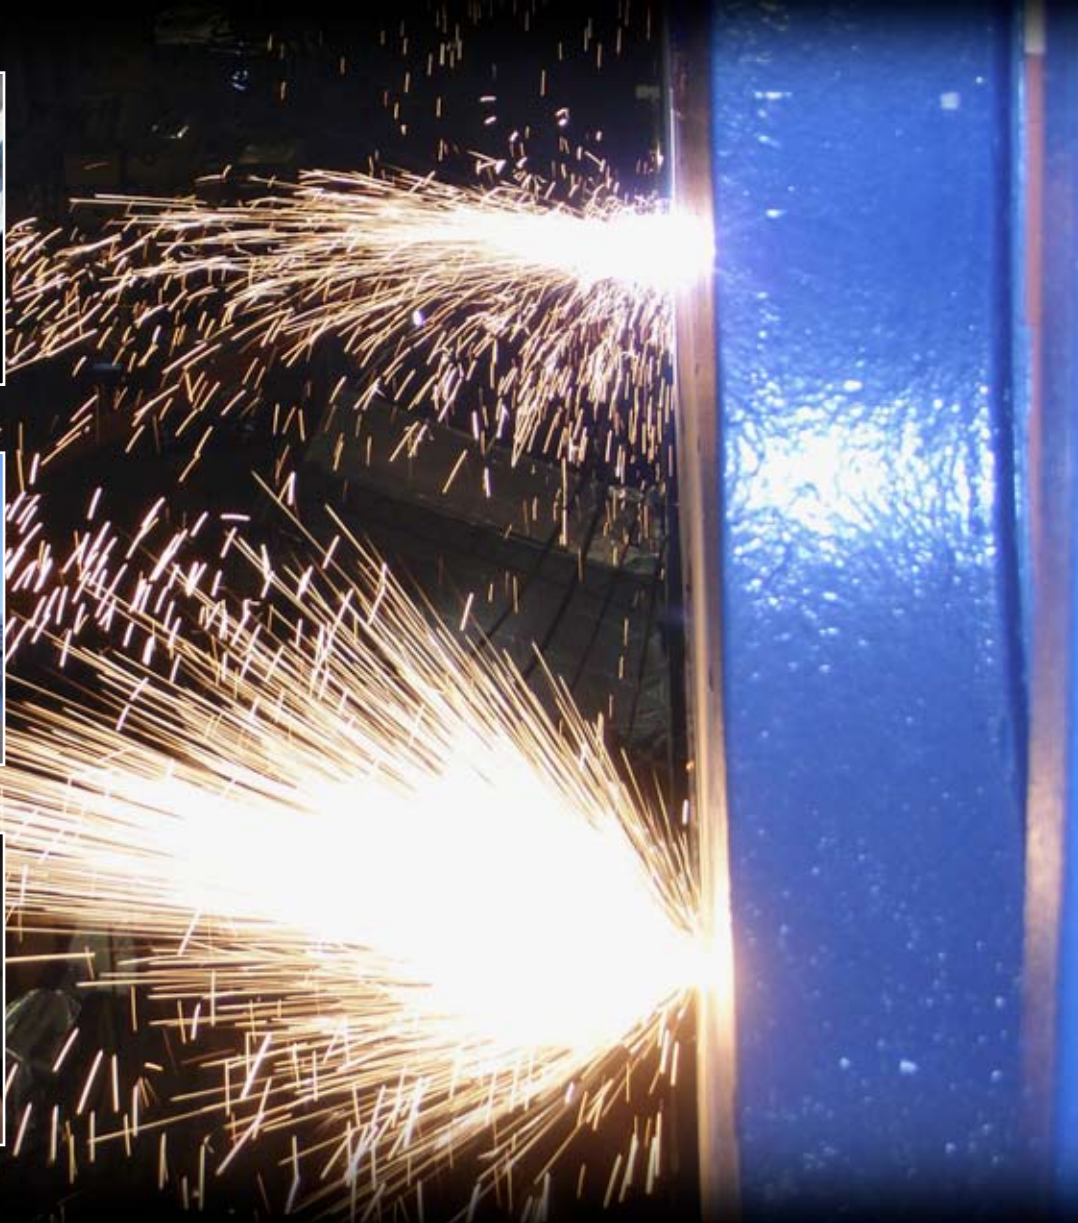

WHARVES, PIERS AND BRIDGES

- AL-profile construction with rubber coating on top
- As light as traditional wooden, but as strong as fixed concrete/steel construction
- Never slippery

Mein Schiff

In a major refit and extension work in spring 2009 LSK-Project assisted in adding 400 aluminium balconies to the 75.000 tons cruise liner Mein Schiff adding some 2.000 sq.m. to the passenger area. Our responsibility covered everything from planning, construction, building and installation.
